

DIRECT FOAM INJECTION SKID

Output: 12 GPM to 300 GPM @ 300 PSI

Foam Concentration 1% @ 30,000 GPM, 3% @ 10,000 GPM and 6% @ 5,000 GPM

Push-button control of foam proportioning rates from 0.1% to 10% in 0.1% increments

Shows current flow-per-minute of water

Shows total volume of water discharged during and after foam operations are completed

Shows total amount of foam concentrate consumed

Transfer pump capabilities

Stainless steel construction

Skid or trailer mount option available
